

“The 3D-counting device handles our delicate bakery and pastry products gently, with great speed and accuracy.”

SKROZ DOBRA PEKARA  
(SERBIA)

Miloš Mladenović  
Production Director

**SKROZ DOBRA PEKARA** is a Serbian family company founded in 1999 which has fast become one of the largest industrial bakeries in the country. They offer a vast variety of fresh and frozen bakery and pastry products in more than 70 bakeries across the country and several supermarkets across the continent. Committed to innovation, both in automating its production line and offering new, exciting, and tasty products, a new bakery and pastry plant was opened in 2013, scaling up the quantity and improving the quality of production.

Today, Skroz Dobra Pekara has become a market leader whilst maintaining a next-door bakery charm, synonymous with good taste and customer satisfaction.

Mr. Mladenović, Production Director at Skroz Dobra Pekara, comments: “With the fast growth in the last couple of years, our equipment could no longer keep up with the production requirements. On the particular production line, we produce bakery products of varying shapes and sizes, and therefore needed **a unique solution that would be easy to use and maintain by our operators.**”

“With so many positive references, extensive experience, and a reputation for being reliable we decided that Pattyn would be the right partner to help us bridge the gap and fully automate one of our production lines, enabling continuous production and packing a vast range of frozen products.”

Since 2018, Skroz Dobra Pekara has been working with Pattyn, starting with the implementation of the **ArgoCount-31, a reliable 3D-counting device.** Since then, it has been more than

justifying the sales pitch, **counting our frozen products and constituting them in batches to be packed without a fault.** The ArgoCount-31 handles our delicate products gently, with great speed and accuracy and reduces the time previously needed to complete the process.”

Mr. Mladenović concludes: “In Pattyn we found a professional and attentive partner. We would certainly recommend Pattyn to any prospective new buyer.”

### PRODUCT & CONTAINERS

- Frozen bakery & pastry products packed into various containers

### CHALLENGE

- Automated solution to count and package delicate products of varying shapes and sizes
- Increase speed & accuracy

### RESULTS

- Fully automated counting, batch creating and packing at high speed
- Increased productivity and accuracy
- Less time needed to complete the process

“Since 2018, Pattyn has more than justified their sales pitch, counting our frozen products and constituting them in batches to be packed without a fault.”
